the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (1990-2000) (ONS 2001).

There is a growing awareness of the need to address the health care needs of the elderly population. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of the elderly population. This strategy is based on the following principles:

- To ensure that the elderly population has access to the same quality of care as other age groups.
- To ensure that the elderly population has access to the same range of services as other age groups.
- To ensure that the elderly population has access to the same range of care settings as other age groups.

The strategy also sets out a number of key objectives for the NHS to meet the needs of the elderly population:

- To ensure that the elderly population has access to the same quality of care as other age groups.
- To ensure that the elderly population has access to the same range of services as other age groups.
- To ensure that the elderly population has access to the same range of care settings as other age groups.

The strategy also sets out a number of key objectives for the NHS to meet the needs of the elderly population:

- To ensure that the elderly population has access to the same quality of care as other age groups.
- To ensure that the elderly population has access to the same range of services as other age groups.
- To ensure that the elderly population has access to the same range of care settings as other age groups.

The strategy also sets out a number of key objectives for the NHS to meet the needs of the elderly population:

- To ensure that the elderly population has access to the same quality of care as other age groups.
- To ensure that the elderly population has access to the same range of services as other age groups.
- To ensure that the elderly population has access to the same range of care settings as other age groups.

The strategy also sets out a number of key objectives for the NHS to meet the needs of the elderly population:

- To ensure that the elderly population has access to the same quality of care as other age groups.
- To ensure that the elderly population has access to the same range of services as other age groups.
- To ensure that the elderly population has access to the same range of care settings as other age groups.

The strategy also sets out a number of key objectives for the NHS to meet the needs of the elderly population:

- To ensure that the elderly population has access to the same quality of care as other age groups.
- To ensure that the elderly population has access to the same range of services as other age groups.
- To ensure that the elderly population has access to the same range of care settings as other age groups.
